

## **ABSTRACT**

The Food Ordering System is being developed for customers so that they can order their food in a restaurant. This application takes the food order from the customers through filling the details. The proposed system is completely integrated offline systems.

It automates manual procedure in an effective and efficient way. This automated system facilitates customer and provide to fill up the order details according to their requirements. It includes type of food which they desire to eat.

The purpose of this system is to develop an application for the people who can take order from the customers along with requirements in a restaurant.

## ACKNOWLEDGEMENT

It gives us immense pleasure to present before you our project titled “**FOOD ORDERING SYSTEM**”. The joy and satisfaction that accompany the successful completion of any task would be incomplete without the mention of those who made it possible. We are glad to express our gratitude towards our prestigious institution **DAYANANDA SAGAR ACADEMY OF TECHNOLOGY AND MANAGEMENT** for providing us with utmost knowledge, encouragement and the maximum facilities in undertaking this project.

We wish to express a sincere thanks to our respected principal **Dr. M Ravishankar** for all their support.

We express our deepest gratitude and special thanks to **Dr. C. Nandini, Vice Principal & H.O.D, Dept. Of Computer Science Engineering**, for all her guidance and encouragement.

We sincerely acknowledge the guidance and constant encouragement of our mini-project guides, **Miss. K. Deepa Shree** (Asst. Prof. Dept of CSE) and **Mr. Shiva Sumanth reddy** (Asst. Prof. Dept of CSE).

**B S SAPNA KUMARI**
